Binary Tree

1. Definition

Binary tree is a non-linear data structure in which each node has at most two children

The two children are called
- left child
- Right child

2. Basic structure

Here,
10 → Root node
5 → Left child of 10
15 → Right child of 10

3. Tree Traversal

Inorder → Left → Root → Right
Preorder → Root → Left → Right
Postorder → Left → Right → Root

4. Application

- Search
- Sorting
- Expression evaluation.
